

Light phenomena

The Lord will intervene in world events at the right time, and from now on, approximately forty days, visible celestial phenomena will become noticeable over a wide area, and all attention will be directed to these, as the position of the sun can provide no explanation for them. It is given to humans to seek understanding ... you will also be able to explain many things based on natural laws, but as soon as extraordinary phenomena cannot be explained naturally, the wise of the world are faced with a mystery. And this mystery lies in the intention of the divine Creator. Where all human explanations are inadequate, questions then arise concerning infinity or a divine being

Therefore, you should note that the divine power does not manifest in any other form than what is spiritually beneficial for the humans living on earth ... They must be able to recognize the guidance and omnipotence of God, provided they only have the will to do so ... but on the other hand, they must also have the possibility to remain completely indifferent to such phenomena if their will is so stubborn that it cannot be guided to spiritual understanding.

In direct connection with these phenomena, the temperature will also be so extraordinary that people will wonder about the cause of such striking changes, and the simplest solution will not be found ... that the overall spiritual decline of the earthly humans itself is the cause ... that, due to the extremely strong activity of the beings from the other side, who are in the light and who ... try to assist the beings on earth ... in an overwhelming number near the earth, a change in the entire atmosphere surrounding the earth is also caused. For all mature spiritual beings will manifest in great light, which, however, must mostly remain hidden from humans so as not to cause a forced change in their senses.

But if the Lord permits it for wise reasons that the luminous beings manifest in all their radiance, then this is both a gracious act out of love for the humans on earth and an extraordinary warning sign for all who are in need of light ... the light of truth and understanding.

Only where the wisdom of the world is limited, where the "wise" are faced with a mystery, do they then connect the visible sign with spiritual pondering ... They seek to find an explanation behind it, and if it cannot be found on earth or by reason, they quietly allow themselves to be led into the spiritual realm and look there ... And blessed are those who then find ... who request God's grace and enlightenment and thereby arrive at the true understanding.

So, when these signs disturb the world, you know that the spiritual world is near earth ... Then seek contact with it, entrust yourselves with all your willpower to these spiritual beings, and you will be able to see visible success in all spiritual work and also be able to successfully resist all evil powers, for if you willingly surrender yourselves to these luminous beings making themselves known to you, they will fill you with their love and an unutterable drive for spiritual activity. They give you the ability to look ahead, for they are the messengers of heaven, sent from the Father to earth ... They are the forces that unite with the good on earth ...

Let yourselves be embraced by this power, which will only act as a blessing for you, and recognize, when such phenomena become visible, the workings of God's love for you, children of men, which aims to awaken or strengthen your faith. And be careful not to overlook such warnings without taking note of them. It is only a blessing for everyone if they do not shut themselves off from the work of these light beings but open their hearts and willingly let their power flow into them,

which is only beneficial for the soul and its progress. So wait patiently for the time, which is not far off, so that it may be a time of grace for you

Amen
